

OPTION D — light-touch • keep the rooms, open the back, add light

The moves — light-touch:

• Take out ~half the back (garden) wall on the kitchen/dining side for full-height glass sliders (a beam spans the opening).

• A translucent roof over the kitchen (back-

east corner) + a skylight in every bedroom and over the living — daylight throughout. • Solar panels cover the rest of the roof, both slopes, around the translucent panel and skylights.

• Remove the standalone laundry and roll it into a consolidated rear bathroom suite — wet services stay together so the plumbing reaches the existing water/waste.

What stays exactly as now:

• Bedrooms keep their size and position. Hallway stays; you still enter through the front verandah.

• Bedroom C (23.0 m²) is lettable on size; the Living Room (21.4 m²) can double as a 4th bedroom.

• Front verandah, arcade and roofline untouched.

Cheapest, fastest option — opens the house to the garden, floods the kitchen with light, tidies the plumbing.

THE LAND

PROPOSED PLAN (Option D)

Option D — light-touch conversion
